

Chemistubes flask ø55x100

by Teresa Sapey

CHEMISTUBES relies on the concept of “decontextualization” to create a new object. By increasing its size, using different materials than the original, and repurposing it from its original use, a laboratory container has been transformed into a designer planter that can be used for both **indoor and outdoor** decoration. Specifically, this was achieved by utilizing ecological resin made from polyethylene and applying the rotational molding technique.

Info

Description

Made of polyethylene resin by rotational moulding. 100% Recyclable. Item suitable for indoor and outdoor use. Available in different finishes.

Weight: 6 Kg

FLASK Maceta 100
FLASK Planter 100

C = 5 L
C = 1 1/2 gal
